TAG
(system for user identification
enabling monitoring of the number
of collections executed).
The TAG will also allow for a possible
future application of a pay-as-you-
throw tariff

From waste to resource

Today, more than ever, it is important to reduce and separate waste in order to reuse it, recycle it and transform it into new resources.

All of this is aimed at improving the quality of life for people, truly making a difference. In this way, we can take care of the environment and make **life bluer**.

Within this guide, you will find useful instructions on separate waste collection and on the services provided in our municipality.

Remember that waste must be set out starting from 8:00 p.m. on the day before and no later than 6:00 a.m. on the collection day.

Organics

Organic and compostable waste should be disposed of in the **container with a brown lid with TAG**, using only **compostable bags**.

What to put inside:

raw and cooked kitchen scraps and leftovers, skins and scraps from fruit and vegetables, meat and fish scraps and bones, pasta and starchy foods, bread, rice, fruit pits, shells (of eggs, walnuts, hazelnuts), tea and chamomile tea filters, coffee grounds, corks, dirty pizza boxes that are certified compostable, napkins or paper towels used or soiled with food residues, compostable bags and tableware (bioplastic).

What not to put inside:

cuttings and prunings, garden waste (grass, leaves), animal excrement, food packaging paper (greaseproof, laminated or with aluminium), cigarette butts, biodegradable litter, liquids, oil, chemicals, rags, wood, ashes (from fireplaces or barbecues).

Compostable materials

Packages marked with at least one of these symbols, accompanied by the wording "bioplastic", can be disposed of with organic waste.

Collection days
Mondays and Fridays

From June to August also on Wednesdays

Plastic and metal packaging

WARNING

With the changeover to the new collection system, **metal packaging** goes into the **yellow bag**.

Plastic and metal packaging
go in the **yellow bag**.

What to put inside:

bottles, plastic plates and cups, plastic bags and film (including cellophane), bottles and tubes, trays, tins and containers for food (also in polystyrene and plastic), plastic wrap for packing, including bubble wrap, metal caps, cans for beverages and liquids, empty spray bottles without hazard symbols.

What not to put inside:

plastic furniture and artefacts, toys and/or hard plastic objects, pens, disposable razors, electronic cigarettes and toothbrushes.

Remember: the transparent bag only accepts 'packaging', that is, containers necessary for packing and transporting solid or liquid materials. **Empty the containers and reduce their size where possible.**

Collection days
Friday

Glass

WARNING
With the changeover to the new collection system, **metal packaging** goes into the **yellow bag**.

Glass should be placed in the **container with a green lid with TAG**.

What to put inside:

glass bottles, glass containers, glass jars, glass flacons, food jars.

What not to put inside:

mirrors, crystal, ceramics, porcelain, light bulbs, neon tubes, plexiglass, pyrex sheets and oven glass, container lids and metals.

Remember: the disposal of ceramics and porcelain together with glass compromises the entire material recovery process.

Empty the containers and remove their caps before disposal.

Collection day
Wednesday

Paper and cardboard

Paper and cardboard should be disposed of in the **container with a blue lid with TAG.**

What to put inside:

newspapers, notebooks and magazines (without adhesive, metal or plastic parts), Tetra Pak containers (milk, fruit juices and other drinks), paper bags, cardboard trays and boxes for food, cardboard packaging for toys and clothing, and pizza boxes without food residue.

What not to put inside:

food-stained paper, thermal paper receipts, non-recyclable baking paper, laminated tickets, cellophane wrap, pizza boxes with food residue, plastic bags.

Collection day
Wednesday

Unsorted waste

All waste that cannot be recycled should be put
in the **container with a grey lid with TAG.**

What to put inside:

dirty, oiled paper, dirty, non-compostable pizza boxes, broken dishes and ceramics in general (in limited quantities), small, non-electronic plastic toys without batteries, CDs, DVDs, cassettes and videotapes, vacuum cleaner filters and bags, sanitary pads, plasters, disposable razors, cigarette butts.

What not to put inside:

batteries, oils, medicines, containers and hazardous materials (glues, paints, solvents, insecticides), low-energy lamps and neon lamps, small mirrors.

Collection day
Monday

Collection Centre

At the **Municipal Collection Centre on Via Maddalena 109**, you can dispose of all recyclable municipal waste, hazardous waste as defined by current regulations, and WEEE*.

Access is permitted with the dedicated card for domestic and non-domestic users.

Monday to Saturday	9.00 a.m. - 12.00 p.m. / 2.00 p.m. - 5.00 p.m.
Sunday	9.00 a.m. - 12.00 p.m.

What to bring:

- sheet glass
- iron
- wood
- paper and cardboard in pieces
- plastic and metal
- cuttings and prunings
- batteries
- car batteries
- bulky
- inert waste, rubble, in small quantities (1 cubic metre every 6 months)
- hazardous domestic waste
- frying oil and grease
- mineral oils
- depleted toner cartridges
- WEEE:
 - R1 (refrigerators, freezers, air conditioners)
 - R2 (washing machines, dishwashers, hot water heaters, cooking hobs, cookers)
 - R3 (TVs, monitors)
 - R4 (various devices, small appliances)
 - R5 (light sources)

* WEEE

All appliances and technological products, of every type and size, which need an electric plug or batteries to function. For example: refrigerators, washing machines, televisions, computers, monitors, mobile phones, cameras, video games, MP3 players, clothes irons, hair dryers, blenders, vacuum cleaners.

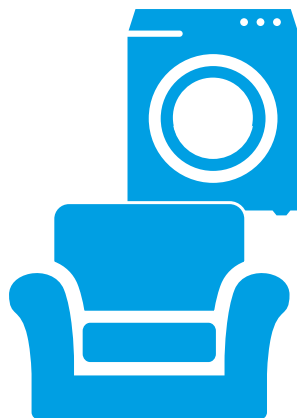

WARNING: if not correctly disposed of, WEEE items are a source of serious pollution in the air, water and soil.

Bulky waste

For the disposal of bulky waste, such as furniture and large household appliances, a **free pick-up service by appointment is available**.

The pick-up request is to be made by specifying the type of waste for which the pick-up service is requested. Remember that materials must not be larger than 2.5 m per piece; the maximum number of pieces that can be booked per collection day is automatically calculated by the system according to the type of waste.

The collection can be **booked online at apricaspa.it, via the PULlamo app**, or by calling the **toll-free number 800 437678** from Monday to Friday from 8 a.m. to 8 p.m. and on Saturdays from 8 a.m. to 3 p.m.

Materials for collection must be placed outside your home by 8 a.m. on the agreed date, in a location that is accessible to the collection vehicles but does not obstruct the circulation of other vehicles or pedestrians. This service does not include the clearing out of cellars, attics, garages or other portorage work on private property.

Nappies and incontinence pads

Sanitary textile waste (nappies, incontinence pads, and underpads) should be disposed of in the appropriate **light blue bag**.

There are several dedicated containers available in the area. Alternatively, it is possible to use the door-to-door service with collections on Mondays and Fridays.

The service is dedicated to families with **children under the age of 3** and/or to persons with medical conditions who will **request it at the Ecosportello office**.

**Collection days
Mondays and Fridays**

Collection of cuttings and prunings

Door-to-door service available upon request.

Collection is available from 7 October to 30 November 2025 and from 1 March to 30 November 2026.

To subscribe to the service, it is necessary to complete the form downloadable from the following QR Code and send it via pec email to: protocollo@pec.comune.nave.bs.it.

Alternatively, the form can be delivered by hand to the protocol office.

The weekly door-to-door collection service will be provided **on Tuesday mornings until November 2025 and on Monday mornings from March 2026**, subject to subscription.

How much does it cost?

The service costs 40€ per year. **For the year 2025, the service is offered free of charge**, subject to acceptance to use the service also for the year 2026.

Paid service for collection with a grab and shredding

The service is available by appointment by calling the **toll-free number 800 434678**:

On-call collection with grab crane

- Collection up to 3 cubic metres
- Bookable by everyone (including those who are not part of the door-to-door collection of cuttings)
- Service carried out within 7 days upon reaching at least 5 bookings

€ 38,50 / intervention

On-call home shredding service for prunings

- Shredding of prunings up to 8-10 cm in diameter for up to 2 cubic metres
- The wood chips will remain on-site; they cannot be disposed of in the door-to-door collection service or at the Recycling Station. Information will be provided on the correct method of using them in composting
- Bookable by everyone (including those who are not part of the door-to-door collection of cuttings)
- On-demand service carried out within 7 days

€ 38,50 / intervention

Collection day

Tuesday

from October to November 2025

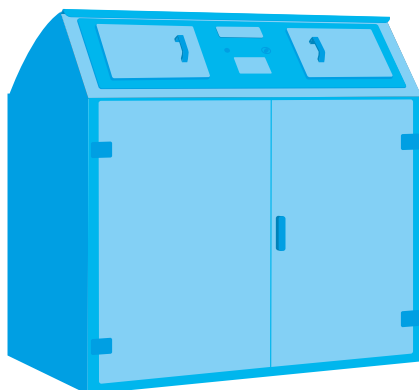

Monday

from March to November 2026

Recycling stations

Separate waste collection using computerised containers that open with a card or dedicated app, for the collection of organic waste, plastic and metal packaging, paper and cardboard, glass, non-recyclable waste, and nappies.

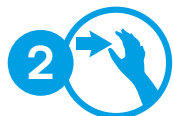

This innovative collection system helps to improve the urban decorum of the municipality and to raise everyone's awareness of the importance of sorting waste conscientiously and in an environmentally friendly way.

Instructions for opening the recycling stations

If using the card, press the button and hold the card near, or alternatively, use the App on your smartphone

Open the door of the recycling station

Insert the waste

Close the door of the recycling station

Remember: The Recycling Stations, constantly monitored and supervised, should only be used when necessary and up to a maximum of 15 times a year on an experimental basis. The primary method of waste collection remains door-to-door

WEEE

All appliances and technological products, of every type and size, powered by electric plug or batteries.

For example:

Refrigeration and air conditioning

R1

Refrigerators, air conditioners, freezers, etc.

Large white appliances

R2

Dishwashers, washing machines, hoods, ovens, etc.

Devices with screens

R3

Televisions and CRT screens, tablets, etc.

Consumer electronics

R4

Lighting equipment, photovoltaic panels, small electrical appliances, etc.

Light sources

R5

Light bulbs, gas-discharge lamps, fluorescent lamps, etc.

WARNING: if not correctly disposed of, WEEE items are a source of serious pollution in the air, water and soil.

Ecocar

Hazardous urban waste can be delivered directly to the **Ecocar**, a vehicle equipped for transport to storage centres, where it is separated and sent for recycling.

What can be delivered to the Ecocar

Depleted batteries, toxic gas lamps **Ecocar** and CRT tubes, used vegetable and mineral oils, expired drugs, mobile phones, computers, monitors, CD and DVD players, paints and insulation, automotive products, DIY products, gardening products, ammonia, thermometers (not mercury ones), insecticides, disinfectants, used toners.

The **Ecocar** stops on the 1st and 3rd Tuesdays of the month at the Market in Piazza Martiri della Libertà from 8 a.m. to 12 p.m.

Spent oils

We have placed specific street containers in the area to collect used vegetable oil, which should be put in plastic bottles, well-sealed in the containers (allow the oil to cool completely before it is 'disposed of').

It is important to know that the oil dispersed in the environment:

- prevents plants from absorbing nutrients
- prevents the oxygenation of flora and fauna
- can contaminate drinking water wells and groundwater reserves
- can cause serious issues to plumbings and drains
- compromises the proper functioning of the purifiers.

What to put inside:

oil and fats from frying
and oil from canned foods
(tuna, mushrooms, etc.).

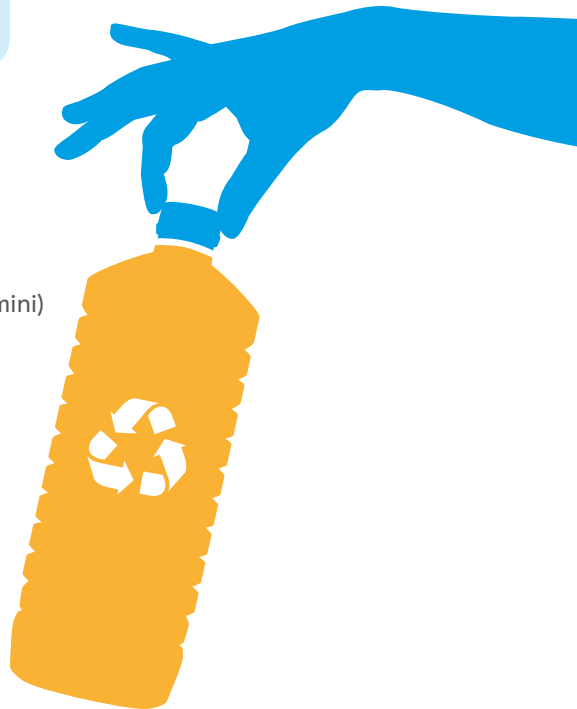

What not to put inside:

wash water, synthetic motor oil,
food residues.

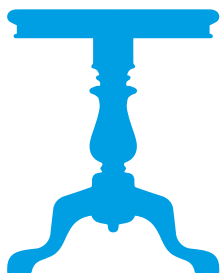

Containers across the area:

Piazza Santa Maria Ausiliatrice
Via Brescia (near the former Fenotti Comini)
Via San Francesco
Via San Marco

You can always take them
to the Collection Centre as well.

Reuse Hub

At the **Reuse Hub, Via Maddalena 109, within the Collection Centre**, you may offer others items you no longer use, such as books, furniture, toys, ornaments and home furnishings, which can still be utilised.

With this service you can:

- **reducing waste** for disposal
- **giving value** to used goods by extending their life cycle
- **overcoming** the throwaway culture
- **sensitising** citizens to respect the environment

Ecosportello office

At the Ecosportello office it is possible to pick up bags and bins as well as request general information on separate waste collection.

In addition, it is possible to activate specific services such as the collection of nappies and cutting and pruning, request the replacement of bins due to theft or breakage, and return the bins in the event of termination of the TARI position.

Location and hours

At the Municipal Technical Office in via Paolo VI, 17 on the following days and hours:

Day	Hours
Monday	from 4.00 p.m. to 6.00 p.m.
Thursday	from 10.30 a.m. to 1.30 p.m.

Where should I dump it?

Discover in which container you can place your waste items or where to bring them.

The **Where should I dump it?** can also be found on the Puliamo App. A search option for the destination of the waste item is also available on the App, by scanning the product's barcode.

Download it free, from the app stores, to your mobile devices.

Your choices make a difference.

If you separate waste correctly, we recycle it and transform it into new resources, ensuring nothing is wasted.

Did you know that:

A watering
can be made from **5**
plastic bottles

A new glass
bottle can
be made from **7**
glass jars

From **4**
packages of pasta
you get
1 notebook

With **800** cans
you can build
a bicycle.

Food waste
is turned into
soil for
growing
plants and
flowers.

Municipality of
Nave
